What you'll learn in this Adobe Illustrator Brush tutorial How to make a brush in Illustrator How to make a blood spatter brush illustrator How to make a drip brush Illustrator How to make an ink spatter brush Illustrator How to make a paint spatter brush Illustrator Follow along with us in our Envato Tuts + YouTube channel! : 1. Create a new document and Set Up Grid Hit Control-N to create a new document. Choose Pixels from the Units drop-down menu, type 850 in the width and height boxes, and then click Advanced Options. Select RGB for Color Mode, click Raster Effects (72 ppi), and then click Create Document. Enable Grid (View &gt; Grid Show) and Grid Alignment (View &gt; Grid Alignment) You'll need a grid for every 5 px, so you can simply go to Edit &gt; Options &gt; Guides &amp; Grid, and enter 5 in the Gridline for each box and 1 in the Splits box. Try not to be discouraged by the grid — it makes your job easier, and keep in mind that you can easily enable or disable it using the Control keyboard shortcut. Learn more about Illustrator's grid system in this short tutorial, Andrei Stefan: Understanding the Grid in Adobe Illustrator. You also need to open the Data panel (Window &gt; Info) for live preview with the size and position of the shapes. Be sure to set the unit of measure to pixels from &gt; Edit Settings &gt; units. All these options significantly increase the speed of work. Now that you've set yourself up, let's start working on adobe illustrator brushes. 2. How to create the first spatter brush in Illustrator 1. Set the Width and Height value to 300 px, and then click OK to create a circle of 300 px. Step 2 Make sure the circle is still selected, remove the stroke color, and focus on the fill. Apply a black-and-white gradient from the Swatches panel (Window &gt; and radial gradient using the Radial Gradient button in the Gradient panel (Window &gt; Gradient). Step 3 Make sure that the shape remains selected, and then choose Effect &gt; Texture &gt; Grain. Move both sliders to 100 and select drop-down menu, and then click OK &gt;. Drag the Threshold slider to 210, and then click Advanced. Set Curve to 80%, Corners to 0%, and Noise to 1 percentage point. Clear the Align paths to lines check box, select the Ignore White check box, and then click Expand in control panel. Step 5 Convert the group of shapes to a single compound path (object &gt; compound path &gt;, or Control-8) and change its color to R=237 G=28 B=36. We will use this compound path to create the scatter brush in Illustrator. 3. Create an ink-spatter brush in Illustrator 1. Step 2 Use the same tool to create a 10 px circle and a 20 x 30 px oval shape. Fill both shapes with R=46 G=49 B=146 and place them as shown in the image below. Be sure to leave a 45 px gap between the two shapes. Step 3 Select the Rectangle tool (M), create a 20 x 65 px shape and place it as shown in the first image. Focus on the top side of the rectangle and select the Direct Selection tool (A). Select the left anchor point and move it 5 px to the right, then select the right anchor point and move it to 5 px to the left. Select the shape you created in this step, along with the two oval shapes you created in the previous step, and then click merge in the Pathfinder panel (Window &gt; Pathfinder). Step 4 Make sure that the shape you created in the previous step is still selected, and go to effect &gt; &gt; ousting shape shape. Select the options in the image below, click OK, and then click Object &gt; Expand Appearance. Step 5 You can now disable Grid (Control) and Snap to Grid (Shift-Control). Select the dropper shape and place it roughly as shown in the first image. Multiply this shape (Control-C &gt; Control-V), resize these copies, and scatter them as shown in the second image. Step 6 Select the Pen tool (P) and draw a path that makes the relationship between the drips and the main circle much smoother, as shown in the first picture. Switch to the Ellipse tool (L) and add a few small drops, as shown in the second image. Step 7 Use the Pencil tool (N) to add a wavy curve to the top half of the circle. Step 8 Select all blue shapes, click Merge in the Pathfinder panel, and then convert the resulting group of shapes to a compound path (Object &gt; Compound Path &gt;, or Control-8). Use this compound path to create a dropper brush in Illustrator. 4. Save and use splashes in Adobe Illustrator &gt; 1. Select the Postscript check box, and then click OK. Step 2 Select the blue compound path and click New from the Brushes panel (Window &gt; Brushes). This time, select Brush and click OK. Drag one guide where the drip starts at this time, and the other, where the drip ends like this, make sure it's the only part of the brush that elongates when you use the brush. Select the other options in the image below, click OK, and you'll have the paint spatter Illustrator brush. Alternatively, you can change the color of the compound path to red and easily create a blood-spatter brush in Illustrator. Step 3 Finally, you can select the Brush tool (B), select one of the Adobe Illustrator injections, and test it. Congratulations! You're ready! Here's how the Illustrator blood drip brushes should look like. I hope you enjoyed this tutorial and apply these techniques to future projects. Feel free to share the final result in the comments section. Feel free to set up the design of these Adobe Illustrator brushes and make them your own. In GraphicRiver, you can find great sources of inspiration that offer interesting solutions to improve Illustrator brushes. Popular Adobe Illustrator brushes from Envato items Whether you're looking for Illustrator splash, an Illustrator ink stain brush, an Illustrator paint spatter brush, an Illustrator drip brush, or even an Illustrator blood spatter brush, Envato Elements is the perfect place for you.
